Professional summary

I am an aspiring data analyst and AI Enthusiast , currently pursuing my Btech-AI & DS. I have a deep interest in working with data analyzing patterns, extracting insights, and applying AI-driven solutions to real world problems. Beyond data science, I have a strong passion for game development. I enjoy combining creativity with technology using C#,Unity and Blender to build engaging and immersive experiences. Exploring different aspects of software development has helped me develop problemsolving skills and a keen eye for detail.

I am also an active member of Toastmasters club where I continuously refine my communication and leadership skills. Driven by curiosity and innovation, I always seek opportunities to learn, improve, and push boundaries.

Education

2023 - Now

B-Tech of Stella Mary's College of Engineering, India, Nagercoil

Pursuing B.Tech in AI & Data Science at Stella Mary's College of Engineering. Gaining expertise in data analysis, machine learning, and AI-driven solutions, with a strong focus on real world applications and innovation.

2019 - 2023

Higher secondary of SLB Govt. Higher Secondary School

Completed my higher secondary education as a biology student, building a strong understanding of scientific analysis and research. Later, I developed a passion for data science, seeing how data-driven insights can be applied to various fields, including healthcare and technology.

Projects

SIH

Worked on the Smart Bin (S-Bin) Project for Smart India Hackathon (SIH), focusing on waste segregation and disposal using sensors and smart notifications. Our idea received seed funding from our college to develop and refine the prototype for real-world impact.
